FOR: SCREW REFRIGERATING APPARATUS

STATEMENT OF RELEVANCY

Reference AO on Form PTO-1449:

This reference is explained in the specification.

PURPOSE: To enable a compressor to easily start and to do so even in a situation that pressure during its stop is high as just after its defrosting, by installing an unloader mechanism to the higher stage side of a two-stage compressor.

CONSTITUTION: A compound-type two-stage screw compressor has a casing 4 of a higher stage, a casing 1 of a lower stage and rotors 2, 3, 5, 6. Here a bypass hole 16 is installed to bypass gas in compression stroke into the casing on the higher stage side and rotors 5, 6. The gas in compression stroke is thus bypassed (an unloader function) to a medium pressure part and the pressure does not rise, so a starting load can be lightened.
